**FACULTY POSITION
GENE REGULATION, CELL SIGNALING, OR EPIGENETICS,**

The Department of Molecular Physiology & Biophysics at Vanderbilt University School of Medicine seeks candidates for a tenured or tenure track faculty position at the Assistant, Associate, or Full Professor level. Rank will be commensurate with experience. The successful applicant will have a track record of outstanding scientific accomplishments in the areas of chromatin structure/function and transcription, epigenetics, and/or cellular signaling. We are interested in a wide variety of model systems and experimental approaches, including biochemistry, molecular biology, animal models, genomics, proteomics, bioinformatics, and computational biology. Responsibilities will include the development and maintenance of an independent, externally funded research program as well as teaching and mentoring graduate and medical students. Applicants must have a Ph.D. and/or M.D. The anticipated start date is July 1, 2012.

Please send curriculum vitae, two-page research statement including past accomplishments and future goals, as well as contact information for three references to Chair, Search Committee, email: mpbfaculty.search.stein@vanderbilt.edu.

Vanderbilt is actively seeking broad diversity in the recruitment of this and other positions at the institution. We welcome applications to support this effort of greater faculty diversity and inclusion at Vanderbilt School of Medicine.
